

## Over The Speaker

Continued from Page One

were afraid workmen employed in the offshoots would be influenced by their employers to vote for recall.

Said Gerald O'Connor, Liberal member for Edmonton, "There can be no danger if a secret ballot is provided. Will you support the amendment if a secret ballot is ensured?"

"No, I'm voting for repeal," decided Mr. Baker. Mr. Ansel, Social Credit member for Leduc, feared a secret ballot might be unconstitutional. He added, "when high finance uses the act to attack our cabinet, the weapon must be taken out of the hands of the enemy."

"You are a lot of poor sports," retorted Mr. O'Connor. "You lay down the rules of the game and when the game goes against you, you want to quit playing. This is a cowardly snipe. I suggest that you should have it printed on yellow paper."

Mr. Ait, Social Credit M.L.A. for Olds, in defending the repeal, said, "necessity knows no law," to which Mr. Ansel added, "if it had been a private member it wouldn't have mattered so much, but when they get to work on the Premier it's too much. I'm told they are getting ready to work on other members of the cabinet in industrial constituencies."

It was after this that Mr. Bourcier suggested that any of the opposition members who felt like it could "come and listen to the Parliament buildings with their own ears."

Several bills were put through committee, including the important one to give the Speaker an extra \$25 and the private members an extra \$10 a day up to ten days for the work of the special session. Reported also was the Minimum Wage for Men bill. This will provide a basic wage of 23 1/2 cents an hour for men in the fur, range and other exempted industries. The bill for the taxation of stocks was also reported.

Liberal leader J. J. Bowser wanted to know from the provincial Provincial Secretary "what will happen if the Senate can't pay this interest?"

"We will meet that session as it arises," was the answer of Mr. Manning. "Have the law officers of the Crown passed upon the legality of the Senate Taxation bill?" asked Gerald O'Connor, M.L.A.

"No, not specifically," admitted Mr. Manning.

"Would you object to submitting it to them for their opinion before the bill reaches third reading?" persisted Mr. O'Connor.

The Provincial Secretary declined, saying, "I don't think it is necessary."

Ex-Attorney-General Hugh Ait reported.

Mr. Manning.

"Would you object to submitting it to them for their opinion before the bill reaches third reading?" persisted Mr. O'Connor.

The Provincial Secretary declined, saying, "I don't think it is necessary."

## Camrose Mailman

Well, you asked for it, folks—and here it is!

Your Camrose Mailman—in person. Listen . . . "How d'ya do, friends in Camrose and district, presenting once again the Camrose Mailman, your daily request program, sponsored by the merchants and business men of Camrose and the Camrose Board of Trade."

FRIENDLY GREETING  
Now, the first request in the list this afternoon goes to . . . and so on six days a week, since December 15, 1936. Of course you recognize it—the friendly greeting that starts every day of your load speaker daily at 1:30 p.m. from CFYN.

The Camrose program took the air for the first time on the night of June 15, 1937, and was a fifteen minute evening feature until Nov. 15, when the sponsors decided to extend the time to a half-hour program and to create the character of "The Camrose Mailman," the gentleman who from that time on started "substituting" on your requests. Birthday greetings and dedications have been exchanged by the thousands.

100 LETTERS A DAY  
Just to start off, between November 11, 1936, and May 11, 1937, the Camrose Mailman received 101 pieces of mail. During the "busy season" letters addressed to this program average one hundred per day—and in the "off season" the much-harassed mailman still has to contend with some twenty letters every day of the week. And whence come these letters?

Let's take any one day—here we go, February 4, 1937. 96 letters, coming from 47 different country points. March 4, 1937—small mail bag that day—only 68 letters from 34 points and so it goes—and so they remember the program!

Your Letters from ex-residents of the Camrose district have been received from all over the U.S.A. and Canada and quite a number from England. And just who is the Camrose Mailman? There are not very many folks in this neck of the woods who are not acquainted—at least by name—with him. It's Sid Lancaster, CFYN's chief announcer, . . . and until 1:30 Monday, on behalf of our sponsors, this is your Camrose Mailman bidding you a very pleasant Good Afternoon."

Fire Cat Killed  
NORTH SYDNEY, N.S., Oct. 2.—When an alarm rings in the North Sydney fire station now, Sally black and white cat, mascot of the department, will not be there to take her usual place on the running board of the engine. Sally was run over by an automobile.

REBELS POISE FOR BLOW AT COVADONGA  
HENDAYE, Franco-Spanish Frontier, Oct. 2.—Spanish insurgent troops today poised for another smash at Covadonga, where national shrines are defended by the rugged mountain men of Asturias in one of the wildest regions of all Spain.

Driving a tortuous path toward Quij, focal point of the government's last stronghold on the northern coast, two insurgent brigades moved toward the neighbor towns of Gavadonga and Cangas de Onís. A column, column, west of the Sella river, threatened a rear attack by a move down the valley.

Insurgents again harassed Madrid's defenses to the northwest, on the Coruna road, and to the southeast on the important Valeris highway. The strength of the attack indicated the insurgents have been reinforced.

A fleet of tanks rode through an artillery barrage to the wire entanglements protecting government trenches on the Coruna road, but was turned back by machine gun fire.

At Valencia, government of Spain's parliament met. Premier Juan Negri said his government was prepared to guarantee "the personal safety of all refugees not guilty of offences" who have sought refuge in Madrid's embassies and foreign legations.

Two Banded Ducks Shot at Bashaw  
BASHAW, Oct. 2.—Two ducks, banded by the Biological Survey, Washington, D.C., were shot this week. Howard Larrin shot a mallard duck banded No. 70713-35 and Alphonse De Loeuw shot a duck banded No. 14413-37.

G. Weiss does not need to go hunting game unless he wishes to, as he has raised eight wild geese on his own place along with tame ones and has been successful so far.

Several bills were put through committee, including the important one to give the Speaker an extra \$25 and the private members an extra \$10 a day up to ten days for the work of the special session. Reported also was the Minimum Wage for Men bill. This will provide a basic wage of 23 1/2 cents an hour for men in the fur, range and other exempted industries. ## Silver Anniversary Is Celebrated By The Crescent Furniture Co.

Firms Grows From Humble Start on 97 Street to One of Most Progressive Furniture Stores in Alberta

This week marks the silver anniversary of the Crescent Furniture Co. Limited—one of Edmonton's premier furniture stores—now celebrating 25 years of service in Edmonton and district.

Growing from a small store on 97 street to one of the most modern stores in the west is a tribute to the energy and enterprise of the business.

Mr. Podersky, the present general manager, started the business in a modest way on old Napanee avenue, now known as 97 street. At that time Mr. Podersky specialized in auto seating and conducted many successful sales throughout the district. The store was established in the year 1912, when Edmonton boasted a population of 50,000, the same year that Edmonton and Strathcona amalgamated into greater Edmonton.

After 12 years of successful business, due largely to the enterprise and foresight of Mr. Podersky, he decided to expand and enlarge the business. Therefore, in 1924 he purchased the Greenfield Furniture Exchange located on the corner of 98 street and Jasper avenue. Simultaneous with this move, he entered into partnership with Mr. H. L. Baltzan, who now is secretary-treasurer of the firm.

On the opening of this store, a large electric sign erected, at that time one of the largest in the city. Under a policy of presenting quality furniture at a price to meet the needs of modest incomes, the business flourished.

At this time Mr. Podersky inaugurated the credit and budget plan, for the benefit of those customers who could not afford a large outlay of cash. During the years, many married couples just starting out in life, then was created a "happy home" by their own terms, that has

H. L. BALTZAN  
Secretary-Treasurer of the Crescent Furniture Co. Ltd.

## Founder

since been an integral part of the business.

So great was the response to this effort to help home owners furnish their homes in the easiest and most convenient way—that it was decided to introduce a plan whereby customers could receive a credit on old furniture they desired to discard on the purchase of new. The "Crescent Trade-in Plan" was established and has proven one of the biggest successes of the business. So large indeed was the turnover in used furniture, a special floor had to be devoted to this need, and once again the Crescent expanded and opened a "Bargain Basement." This brought service in quality used furniture for many who felt

they could not afford to purchase new furnishings.

At this location the Crescent enjoyed great patronage from all parts of the city and country. As time went on they added many new departments and featured the "group special" plan where a entire room could be furnished at one cost. During this time the Crescent sponsored many sporting activities in hockey and baseball and were responsible for many winning clubs. And a bowling team, composed from the members of the staff, has always been high up in championship matches.

With a view to offering customers greater convenience and larger premises for the display of modern furniture—the Crescent moved to more commodious quarters on 101 street. They took over the premises vacated by the Army & Navy department store in May 1933, where they now have one of the finest furniture displays in the city.

A very complete line of modern home furnishings is carried in stock. These include radios and electrical appliances. DeForest-Crosley radios. The famous Parkhill chesterfield suite and studio lounge. Gas and coal ranges, well-known Wedgwood dinnerware from England, and many other nationally advertised

# EDMONTON'S 1937 CLOVER BAR SCHOOL FAIR TOTALS \$1,557,000

## Highlights and Low Downs

By ERNEST CONPER  
**Eighteenth Annual Event Draws Well Over 1,200 Entries**

Eighteenth annual Clover Bar School Fair, which drew 1,200 entries and 28 reached an all time high of more than twenty hundred entries. The fair was held at the Clover Bar School, North Clover Bar and Salisbury took part in it. The fair was put on under the auspices of the Clover Bar School Fair Association, composed of representatives from the various school districts in the Clover Bar area. Dr. H. C. Westlake, supervisor of the fair, said that the fair was a success in every way. The fair was held on the premises of the Clover Bar School, North Clover Bar and Salisbury took part in it. The fair was put on under the auspices of the Clover Bar School Fair Association, composed of representatives from the various school districts in the Clover Bar area. Dr. H. C. Westlake, supervisor of the fair, said that the fair was a success in every way.

## I Saw Today Civic Expenditure Largest Since Before Depression

**Program Includes Improvements to Power Plant, Street Railway System, Telephone, Waterworks, Airport and Arena**

Edmonton's 1937 public works program totals \$1,557,000, the largest undertaking since before the depression, according to a report issued Saturday by Mayor Joseph A. Clarke. The program includes improvements in the power plant, street railway system, telephone department, waterworks, airport, arena and housing. "Every one of these projects has had my personal approval," said Mayor Clarke. "It is a program of civic development, the like of which has not been undertaken since before the depression and is a sure indication that Edmonton is making good on its promise to be a city of the future."

## 3-MAN BOARD IS URGED FOR COMPENSATION Who's Who

**Establishment of a three-man board to administer the Workmen's Compensation Act is urged by the Standard Oil Company.**

Establishment of a three-man board to administer the Workmen's Compensation Act is urged by the Standard Oil Company. The board would be composed of three members, one from the Standard Oil Company, one from the Workmen's Compensation Board and one from the public. The board would be responsible for the administration of the Act. The Standard Oil Company has been a leading advocate of the Act since its passage in 1915. The company has been successful in securing compensation for its employees who have been injured or disabled while working for the company.

## VARSITY PAPER COVERS WIDE TOPIC RANGE

**Student Enterprise Tells of Activities and Has Literary Section**

A work of effort for a week of the student enterprise, the Varsity Paper, has been completed. The paper covers a wide range of topics, including sports, news, and literary features. The paper is published weekly and is a popular read among students. The paper is published by the Student Enterprise, which is a group of students who are interested in journalism and writing. The paper is published in the school building and is available to all students.

## LOOK EXCHANGE MOVES TO WEST ALONG JASPER

# COLUMBUS THUMPS NEWARK'S WONDER TEAM, 6-3

## Pass Receiver Must Learn to Evade Opponents After Catching Ball

In the above picture observe the way a pass is just slightly turned, the arms outstretched with the outside hand a bit higher than the inside. The eyes at all times are concentrated on the ball. Fingers and wrists are loose.

Upon receiving a pass one should always be slightly relaxed—never allow yourself, particularly your hands and fingers, to stiffen.

Once you catch the ball, concentrate and follow it with your eyes until the catch is completed.

Once you receive the ball in your hands, with the thumb mostly in your fingers, drawing it towards your body as contact is made. Don't fight the ball, allow your arms to flow—easily and when the catch is safely made, tuck the ball under the arm that is away from the possible blocker, leaving the open hand for a straight arm.

High passes are usually caught over the shoulder and in full stride. A time being lost in catching the ball. Do not turn the body too much, as it shortens your stride and tends to throw you off balance.

Short passes when caught after a sudden break will be taken from the hands, but when the catch is made, in either case the hands meet the ball first and not the body.

### Ways for a Receiver to Get Past And In the Open

One may know how to catch a pass, but unless he can shake the opponent who is covering him, he will never win the ball. He must also know how to get past the defender and into the open.

### 1. Change of Pace

(a) Run straight at opponent at ordinary speed and just as he is about to cover you, add a burst of speed, simply out-running him before he has a chance to pick you up. This is used mostly by speedy men on long passes.

### 2. The Quick Stop

(a) Run straight at the defensive secondary or tertiary, stop quickly, break a few steps to the left or right, then prepare to catch a fast low ball. This is used mostly to gain a few yards or to sometimes foolplay by a lateral.

### 3. The Quick Break—

(a) Start right at the man and then breaking sharply right or left about a yard from him, picking up added speed as he starts to cover the break must be sudden and speed must be added after the break.

### 4. Delay Pass—Decoy

(a) Send decoy to a given defensive man or men, then break into one of position. The intended decoy breaks momentarily and then goes into the territory into which the defensive man has been deceived.

(b) All decoys are possible receivers, therefore they should be ready to receive the pass.

(c) Decoy must act the same as if they were the intended receiver, otherwise the plan of getting a man in the open is wasted.

(d) Run fast but always have an extra burst of speed in case of the passer overpassing you. Always times you may need it to outrun a man covering you.

(e) A good passing attack is:

### 1. A Great Threat—

(a) Keeps the defence back, keeping your running attack to jump.

### 2. A Good Ground Game

(a) With good passers and receivers a team can gain more ground with less effort than a good running attack.

### 3. A Touchdown Making

(a) Most teams with making and with a poor running attack will go on passes. Long and short, if successful, mean less work for the passer, which is a good thing.

The better the passer and receiver, the longer the gain, the smaller the gamble.

### Monday: Running

The games of the Edmonton club have been played at the new site of the club, which is the oldest in the city, and in the opinion of most visitors has the finest view of the river for running purposes. All series club competitors were brought to a competition in good time.

Smart Sheldrake (Edmonton) and David Probert and Tom Brown (Edmonton) won the 100-yard race. Frank Williams, Walter Manning and Ed (Edmonton) won the 200-yard race.

Double Champion—Manning, Walter Manning and Ed (Edmonton) won the 400-yard race. Walter Manning, Ed (Edmonton) and Ed (Edmonton) won the 800-yard race.

Edmonton Club Champion, Harry (Edmonton) won the 1600-yard race. Walter Manning, Ed (Edmonton) and Ed (Edmonton) won the 3200-yard race.

## ASSOCIATION CHAMPS WIN THIRD GAME

### Capacity Crowd Watches Bears Go Down For Third Straight

NEWARK, N. J., Oct. 2.—The hard-hitting Columbus Red Dicks, champions of the American Association, defeated the champion Newark Bears like just another ball club for the third straight time last night as they beat them 8-1 in the third game of the little world series before a fair capacity crowd of 17,000.

Columbus needs only one more game to take the minor league baseball championship for the third time in five years. They have a chance to finish it on home ground as both clubs retained for Columbus immediately after the game and will play three tonight.

As in the previous two contests, the St. Louis Cardinal farm team combined their hits with Newark errors to come out ahead. They bombed young Mito Tzucchi, husky southpaw, for 10 hits, including a home run by Egon Slaughter with one man on, and had the help also of three Newark misplays.

Slaughter, the Association's batting champion, snugged out his home jump in a big way, collecting two singles besides his seventh-inning homer and driving in three runs.

Max Lanier, young right-hander who won 10 games and lost four in the Association, did a brilliant job of relief pitching, and proved credit for the victory. Taking the place of Nelson Potter in the second inning after the Bears had only three hits until the ninth.

Then, shortly after the break, Columbus (A) 200 000-2-6 1-1 Newark (A) 0-0 000-0-0-3-3 Cooper, Lanier, Potter and Truett; Mito, Higgs, Page and Hestlerberger.

## Mrs. John Broaca Voted One Grand

NEW YORK, Oct. 2.—Mrs. John Broaca, wife of the pitcher who defeated the Cubs in the middle of July, Friday was voted \$10,000 as the best woman in the world for her end of the E.A.C. season, 20 to 50 and five fractional shares.

Mrs. Broaca announced Thursday she was bringing out for dinner from the right-hand-on the E.A.C. Full shares were voted for Man-Field, Schaefer, Coaches Arthur Fletcher, Earl Smith and John Smith, Trainer Earl Painter, and 12 players.

## Time Out — By Chet Smith

I think we're gonna have a tough time with this referee—the other side just presented him with a gold whistle!

## Calgary Ponies Confident Opponents for E.A.C. Team

Primed with pepper and confidence, the Calgary Ponies wheeled into Edmonton last night by bus, ready for today's exhibition football clash with the Edmonton Athletic club at Renshaw park.

Carrying with them seven players who have been working out regularly with the Ponies, the Calgary trotted off to bed last night firm conviction that they had all the work they would need to hand the E.A.C. another setback.

Joe Dwyer, who has been away from his coaching post with the E.A.C. for the past two weeks, has returned and put in several nights intensive drill with his squad. He is satisfied that his gridders will each rope and bring home a Pony or two before the day's battle is over.

Coach Joseph has no intention of taking another defeat at the hands of Calgary. That Brook (Edmonton) was invincible but no Pony here will go to push the E.A.C. around, declares Dwyer in his most decisive tones.

Warm praise was given Dwyer by Coach Joseph on his return. Dwyer handled the coaching while Joe was away and made an excellent job of it.

Following are the players who will be dressed by the E.A.C. today: Eddie Reine, Hefferman, Foster, Hartley, Dwyer, and 12 players.

## Rupert Golfers Seek Eaton Bowl

A. J. Hogg and Eddie McFar, two of Prince Rupert golfers, are the scheduled challengers for the T. Eaton company's golf trophy this Sunday.

Play will get underway at approximately 2:30 p.m. at the Edmonton Golf and Country Club, home of the defending pair, Jim Hestlerfield and Doug Kilham.

## Guiana Defeats Barbados Eleven

BRISTOL, British Guiana, Oct. 2.—British Guiana defeated Barbados by an innings and 220 runs in the final round of the triangular international cricket championship. Scores for the four matches were: Barbados 301 and 58 British Guiana 82.

There are from 30,000 to 40,000 people in the average field now.

"The Crying Need of Essex Centre"

"It's high time this town had a modern dance orchestra," declared Miss Betty Smith, 19-year old daughter of Herb Smith, editor of the Essex Centre Gazette and County Advertiser, as she passed Mr. Picobac, a beaming saucer of ice cream at the gala night of the Essex Centre Boosters' Club. "The time has come—and overcome."

"What's the matter with this orchestra?" laughed her Dad, winking at Mr. Picobac.

"Fiddle fiddle... piggy diggery," scoffed Betty in disgust. "Old time fiddling is all right for old times like you and me, Herb," said Mr. Picobac. "But flaming youth from the march today. I'll vote for your side, Betty. Nothing is too good for Essex Centre."

"Attaboy," said Betty. "And I'll tell the young men I know what I think about Picobac."

"What do you think about it?"

"It's a mild... sweet smoke," quoted Mr. Picobac, laughing.

"So it is," agreed Mr. Picobac, chuckling. "All they have to do is try."

# DEVELOPMENT IN NORTH MINING AREAS REACHES NEW PEAK

## Radium Production Expands; Gold Area Shows Big Promise

### New Ore Mill Is Constructed on Yellowknife Bay Property

Development of northern mineral fields, including all the North West Territories and the Lake Athabasca region of northern Saskatchewan, for all of which Edmonton is the supply base, has gone forward this summer on a scale of unprecedented magnitude.

Radium production by Eldorado Gold Mines, Ltd., at Great Bear Lake, has been tripled this year and has reached the point where the operation is expected to pay a dividend early next year.

The gold and nonferrous base metal developments farther south, in the Great Slave and Athabasca lake regions, are rapidly nearing production. Following is a survey taken early in September.

**Yellowknife River.**—Development is proceeding satisfactorily at a number of properties in this area, which was brought into prominence in 1935 by the discovery of the spectacular gold values west of Yellowknife Bay, Great Slave Lake.

A controlling interest in the Giant property was acquired last month by Hovey Gold Mines and Anglo-Huronian Ltd., and a comprehensive plan of exploration and development has been outlined.

A 100-ton mill is under construction at the Con property of the Consolidated M. & S. Co., which is now reached by a tractor road from Yellowknife Bay. Diamond drilling amounting to 4500 feet was completed at this mine. Surface work and diamond drilling are proceeding at the Ryan Gold Mines group, where it is reported valuable

gold has been found to occur at several places for a distance of 1000 feet along the main vein.

**Gravel Lake.**—At the Cam Laren group, owned by the Mining Corporation, diamond drilling is proceeding, a three-compartment shaft has been started, and a permanent camp is under construction. A road for winter tractor transport is being built a distance of 75 miles southward to Yellowknife Bay. A number of other discoveries are being tested, and the entire area is being actively prospected.

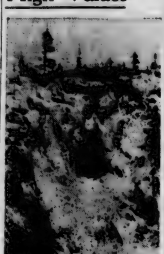

**Great Bear Lake.**—Operations at the radium mine of Eldorado Gold Mines, Ltd., are proceeding satisfactorily, according to Gilbert LaBine, general manager. The capacity of the concentrator will be increased to 100 tons a day upon the arrival of new flotation machines in the fall. It is expected that 500 tons of pitchblende concentrate will be shipped by water this season.

The Northern Transport Company, which is owned by the Eldorado, will also carry this year about 500 tons of fuel oil on the southward trip from Fort Norman to the mining operations on Great Slave Lake of the Consolidated M. & S. Co., Timmins Corporation and Mining Corporation.

A more active program of development has been undertaken at the Contact Lake property of B. E. A. R., and it is expected the mill will be operating this autumn at the rate of 20 tons a day. Selected ore will be treated, and it is estimated silver production will aggregate 100,000 ounces per month. It is stated operating costs will be approximately \$10,000 a month.

**Lake Athabasca.**—The construction of the 1000-ton mill at the Box property of Consolidated M. & S. Co. is advancing rapidly, and

## High Values

Pictured above is trenching carried out by the Edmonton Athabasca Gold Mines Ltd. on property which they control in the north of the Goldfields mining area at Lake Athabasca. Four veins of nickel were uncovered which assayed \$24.14 per ton. Good showings of both gold and silver were also displayed in the trenching carried out at this point.

The Edmonton Athabasca Gold Mines Ltd. was incorporated in October 1935, and the directors are E. H. Molstead, A. J. Maure, J. R. Gidour, all of Edmonton. Development is progressing favorably on the various properties controlled by this company, and their holdings adjoin claims held by the Consolidated Mining, Athabasca, North West Minerals and the Errington group.

## NORTH OWES OPENING TO AIRPLANES

### Air Transport Responsible For Far-flung Mineral Development

Most important single factor in discovery and development of the vast natural treasure house of the northwest has been the increasingly large armada of commercial airplanes that travel the skyways from the Edmonton base to points beyond the Arctic coast and into the heart of Yukon gold country.

It was aerial survey that first discovered one of the largest radium deposits in the world at Cameron Bay, Great Bear Lake, and it was only with the indispensable assistance of air transport that thriving gold mining centres have been developed at Goldfields, Yellowknife, Gordon Lake and elsewhere.

Less than 10 years ago three airplanes with the same number of men engaged in aerial work, operated from Edmonton.

**EDMONTON MEN.**—Today no less than 50 commercial aircraft, including those operated by three major flying companies and others in use by military companies, fly to all parts of the north from the capital. More than 120

men in Edmonton are listed on flying operations payrolls.

Total flights paid for by United Air Transport, Mackenzie Air Service and Canadian Airways Limited, in part by their employees in the city runs into more than \$100,000 in a year, it has been estimated.

These three companies will have 28 airplanes operating continuously on this winter— with more on order as soon as factories can make delivery.

For these reasons Edmonton has been described as "the busiest airport in Canada" and the aerial services extending for many thousands of miles to tap some of the wealthiest natural deposits on the continent are credited with placing the city in a centre of promise unrivaled in the dominion today.

Canadian Airways Limited, has carried nearly 300,000 pounds of express in addition to mail, passengers and freight over far-flung skyways on schedule. Mackenzie Air Service recently has inaugurated a tri-weekly two-way passenger and express service between Edmonton and Goldfields.

**MAIL TO YUKON.**—And United Air Transport in addition to insuring a network of new mail routes in northern British Columbia has made flying history by putting through the first direct air mail service from Edmonton to Whitehorse, Yukon, during the past year.

Since commencement of operations, these companies have completed literally millions of miles of flying under the most difficult flying conditions, with a clean record of no passenger injuries and a minimum of accidents.

## Edmonton-Athabaska Gold Mines LIMITED

An Edmonton Company  
Pioneering in the Development of Northern Mining.

## Announces: IMPORTANT DISCOVERIES OF NICKEL

Have been made on the company controlled claims in the Lake Athabaska Goldfields area. Sufficient gold and silver are present to pay for cost of mining nickel should development prove up to expectations.

## Gold and Silver

Samples have been obtained indicating very valuable deposits on the E.A.G. group of claims on the east side of Cornwall Bay on the north shore of Lake Athabaska at Goldfields. These claims adjoin properties of Altona, Errington, North West Minerals, Sterling Collieries and Consolidated Mining & Smelting Co.

# MINING BASIC FACTOR OF INDUSTRY

## Importance For Canada Greater Since Great War

### Mineral Raw Materials Give Manufacturing Decided Impetus

(From the Northern Miner)  
VANCOUVER, B.C.—The relative importance of mining in Canada has increased greatly during the post-war period, according to a paper on "Mining in the National Economy," prepared in the Dominion Bureau of Statistics and presented at the joint meeting here in September of the C.I.M.M. and A.I.M.E. Mineral output in 1919 was only 8.14 per cent of the total value of all production, but by 1936 the proportion had increased to 12.78 per cent. Mining felt the effect of the depression, but unlike agriculture, it has completely recovered, and in the past two years new records were established in both the physical volume and the value of output.

**BEST CUSTOMER**  
With the unique exception of Japan, it is stated, mining development has been a determining factor in the industrial development of all the great manufacturing countries. In post-war Canada, manufacturing advanced much more rapidly than mining, although the availability of mineral raw materials has given manufacturing a decided impetus. Moreover, during the depression the mining industry was one of the best customers of industry, at a time when good customers were scarce in peacetime. It is the largest buyer of explosives, and a half million dollars is expended annually for flotation reagents, cyanide, acids, and other chemicals. Machinery and equipment have been purchased to the value of more than ten millions in a single year. In 1935 the wage bill paid to mine workers was \$24,800,000, and the total value of minerals produced was \$24,800,000. More than 29 millions in mining dividends was paid to investors.

**OUTPUT PER HEAD**  
The total value of mineral output is estimated at \$120,000,000 every working day. Gold output amounts to \$200,000, nickel \$120,000, copper \$110,000, lead \$40,000, zinc \$40,000, and platinum \$15,000. The total population concerned is essentially directly with the business of mining numbers nearly 238,000, and the retail marketable sales to the group amount to about \$40,000,000.

A considerable contribution is made to the transportation industry by mining, due particularly to the non-seasonal nature of the business. Aviation has been expanding rapidly. The total tonnage of freight and express carried by Canadian aircraft has increased from 2,372,000 pounds in 1931 to 1936 amounted to 25,368,000 pounds. This is considerably more than is carried in any other country.

**IN MALE FIELD**  
According to the census of June 1st, 1931, 71,081 persons were engaged in Canadian mining; of these only 385 were women. Mining is therefore, essentially a male field. No other industry contributes so large a percentage of native-born Canadians. More than one-half of the men that work at mining in Canada were born outside the country, compared with slightly more than a third of the workers in Canadian industry as a whole. Only 1.3 per cent of the native-born population is engaged in mining.

In 1933 the capital employed in mining, exclusive of natural gas, amounted to \$61,000,000, as compared with \$20,000,000 in 1919. This was represented by stock ownership. Of this, over half, \$23,000,000 came from Canada. The United States supplies \$20,000,000 and Great Britain, \$17,000,000. Of dividends estimated at \$25,000,000 paid by Canadian mining companies during 1935, \$25,000,000 went to investors in Canada, \$23,000,000 to the United States and \$2,000,000 to Great Britain.

### FUTURE FOR CANADA

Concluding the paper, the question is asked, What is the future of the mining industry in Canada? There is a wider viewpoint than the direct one of the producer, recent interests in mining output undoubtedly have alarming aspects. For coming generations the Do we fully appreciate, for instance, that there has been as much gold produced in the last twenty years as in the 400 years which followed the discovery that copper production in 1859 alone was equal to the total production of the nineteenth century; and that there was as much oil pumped and consumed in the last eight years as in all history? The mineral situation in one sense at least may be regarded as a deterrent rather than as an incentive of war. Nearly all the minerals necessary for war, but no country has enough of them to challenge war with impunity. No other factor, therefore, seems to point so powerfully from caution and good-will alike, to the necessity of friendly international relations of metals over the earth's surface, and it may be that the very shortages that cause so much uneasiness among the nations at present will in the end direct them in the paths of peace.

### Production of Petroleum Up

The Canadian production of crude petroleum and natural gasoline advanced to a new peak of 205,181 barrels in June, 1937, as compared with 192,485 barrels in May last and 114,500 barrels in June, 1936. During the first six months of 1937 Canadian output was 1,061,581 barrels, representing an increase of 55.4 per cent over the corresponding period of last year. Turkey Valley wells produced 105,658 barrels in June last.

### Good Season

A. J. TOURIGNY.

### Explosives Cost In Cut For Mining

Continuing its long established policy of sharing with its customers, savings effected in manufacturing and operating cost, Canadian Explosives Limited announces a further reduction of twenty-five cents per hundred pounds in the price of high explosives effective August 27th.

Over a period of thirteen years, no less than sixteen consecutive reductions have been made in the price of explosives and the present price is lower than at any time during the past quarter of a century. Despite the rising cost of raw materials and the fact that research is constantly improving the quality of the product, the new low price is made possible by the continued expansion in the volume of explosives being used for commercial purposes.

A few types of explosives, for which there is comparatively little demand, are not included in this reduction due to the abnormal advance in the cost of raw materials used in their manufacture.

The ages of 20 to 25 are the most expensive ages to insure, compared in England.

### Average Metal Prices

## CANADA GOLD OUTPUT SETS HIGH RECORD

347,474 Ounces Produced in Dominion During July of 1937

Gold production in Canada during July set a new high record, advancing to 347,474 ounces from the preceding month's total of 344,880 ounces and the July, 1936 output of 321,107 ounces, according to a statement just issued by the Dominion Bureau of Statistics. A total of 2,320,725 ounces as compared with 2,088,815 ounces a year ago. Ontario's output during July totaled 219,934 ounces and consisted of 90,237 ounces from the Porcupine camp, 83,517 ounces from the Kirkland Lake area, 83,768 ounces, and other sources, 64,313 ounces.

**QUEBEC OUTPUT**  
Quebec operators reported an output of 58,785 ounces; in June, 53,111 ounces were produced. Production in this province during the seven months ended July increased

6.3 per cent over the output for the corresponding months of 1936; the totals were 399,231 ounces and 278,882 ounces, respectively.

A 3.5 per cent decline was recorded in British Columbia output; the July total was 40,738 ounces and the June total 42,201 ounces. Manitoba and Saskatchewan produced 20,141 ounces of gold; in the previous month 19,782 ounces were produced. Gold production in the Yukon amounted to 6,417 ounces in July as against 6,620 ounces in June and 7,548 ounces in July, 1936.

**FROM NOVA SCOTIA**  
The Royal Canadian Mint received 1,486 ounces of gold from Nova Scotia producers in July as against 1,889 ounces in June and 1,380 ounces in July, a year ago. Gold averaged \$35.05 per ounce. In Canadian funds, on the New York market in July, at the price the month's production was worth \$12,718,864. The June average price was \$35.02 and the value of the month's output was \$12,078,225. The gold content of receipts of jewelry and scrap at the Royal Canadian Mint in July was 1,750 ounces as compared with 1,624 ounces in the preceding month.

**WORLD OUTPUT**  
The American Bureau of Mines estimates the world output of gold in July at 3,151,000 ounces of 29.16 per cent above the June production. South Africa produced 697,000 ounces in July as against 670,000 ounces in the previous month.

# POLICE DRIVE FOR SAFE AUTOS ENTERING FOURTH WEEK

## Driving Hazards of Winter Approaching Traffic Chief Says

Police Department Has Issued 5,800 "Brakes O.K." Stickers

With police drive against automobile operators who continue to use machines which have poor brakes entering its fourth week, it was reported from police headquarters here Friday that 5,800 "Brake O.K." stickers have been issued to local garage and fitting station operators.

It is estimated that more than 5,000 cars are now equipped with stickers, which, it has been announced by Chief Constable A. G. Shuter, will insure the driver of a sticker-equipped car that his machine will not be stopped for brake tests.

Statistics released by traffic officers for the month of September show that there were only 81 accidents in the city this year as compared with 107 last year. Where 104 traffic tags were issued for by-law offences in September, last year, only 81 were issued this September.

**DANGERS SHOWN**  
Decrease in the number of accidents was attributed by Sergeant Major Alex Riddell, chief traffic officer, to the co-operation the police department has had from the press in bringing to public attention the danger of careless driving and faulty equipment.

"When people realize that regulations and laws are made," he said, "that they intend to see that they are enforced, in the interests of mutual public safety, they are more than willing to co-operate with us. The papers have been an invaluable aid."

"With winter coming, with the slippery and icy streets, fog, and other dangerous driving conditions which it brings, it is imperative that all motorists take special care to see that their cars are in good mechanical shape so that they can keep them under control at all times."

**OBSTRUCT VIEW**  
"In winter pedestrians often dash across streets with their heads hidden under hat brims, with the result that they fail to keep a proper outlook for approaching traffic. On the other hand, windshields, not cleaned up and fog and swirling snow obstruct the driver's view."

"Many of our fatal and serious accidents occur in the winter months, but, if drivers will see that their machines are kept in good condition, and drive with all possible care, and if motorists will remember that they, too, can avoid accidents by watching out for approaching automobiles, then accidents and fatalities can be reduced to a minimum."

Rabbit metal obtained its name from Jacob Rabbin, who invented the alloy.

## BRITONS SWOOP DOWN ON ARAB TERRORISTS

JERUSALEM, Oct. 2.—British authorities swept down on Arab leaders in Palestine today in a coup designed to crush the Holy Land's long months of terrorism.

Several high Arab leaders were arrested and held for deportation, probably to an island in the Red Sea. The Arab higher committee, accused of being the "brain" behind recurrent waves of terrorism, was declared illegal.

While troops combed with machine guns guerrilla hideouts and the Moslems of Jerusalem, spiritual head of all Arabs in Palestine, apparently escaped the dragnet, he was believed to be hiding within the mosque of Omar, holiest Moslem sanctuary in the ancient city.

Authorities seemed determined to capture the Mufti, Amin El Husseini, descendant of the prophet Mohammed. However, they apparently did not want to transpire upon holy ground for fear of stirring up further Arab resistance.

**Loses Furs**  
LONDON, Oct. 2.—Furs worth \$10,000 were stolen from the Curzon Street flat of Mrs. Zenta Newcomb while she was on holiday. Lost included a chinchilla coat, a mink coat and a dyed ermine coat.

## THE TIMID SOUL

By H.T. WEBSTER

Ask the Junior Members of Any Family About

## Little Orphan Annie — By Harold Gray

AN EDMONTON BULLETIN DAILY FEATURE

It's the Best Kiddie Strip that money can buy.

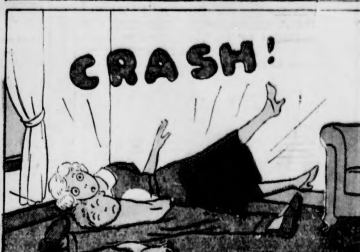

EDMONTON, ALBERTA, OCT. 2, 1937.

## OUT OUR WAY

## The Willets

By Williams

## OUR BOARDING HOUSE

## MAJOR HOOPLE

"The

most thought-provoking column appearing in any paper in Canada today appears daily in The Edmonton Bulletin. The world in review; pithy comment on

Passing

events; local, national and international topics looked at from an interesting angle. Look for it on page 4 every day. "The Passing

Show"

# ALBERTA'S GREATEST SATURDAY COMIC PAGES

EDMONTON, ALBERTA, OCT. 2, 1937.

## THIS CURIOUS WORLD

### The CONY.

A RABBIT-LIKE ANIMAL, KNOWN ALSO AS THE PIKA, AND LITTLE CHIEF HARE, BELONGS IN THE SAME FAMILY AS RABBITS, BUT IS PLACED IN A SEPARATE GENUS, OF WHICH IT IS THE ONLY REPRESENTATIVE.

THE CONY'S CRY IS A SHARP BLEATING NOTE, BUT THE ANIMAL IS DIFFICULT TO SEE AMONG THE ROCKS OWING TO ITS BROWNISH COLOR.

MOST INTERESTING OF ALL IS THE HABIT OF MAKING HAY, AND STORING IT FOR THE WINTER'S FOOD SUPPLY. THE CONY NIPS OFF THE STEMS OF GRASSES AND CARRIES THEM TO A SUNNY PLACE TO DRY.

IT LIVES PERMANENTLY AT HIGH ALTITUDES, PREFERABLY ABOVE THE TIMBERLINE, WITHIN THE SHELTER OF ROCK CREVICES. IT IS FOUND IN EUROPE, ASIA, AND THE ROCKY MOUNTAINS OF NORTH AMERICA.

AFTER THE GRASS IS CURED, IT IS PILED INTO NEAT HAY STACKS, TO BE USED WHEN THE MOUNTAIN RANGES ARE DEEP IN SNOW.

## FRECKLES AND HIS FRIENDS

By Blosser

MOM, WHAT'S A PHREN... A PHRENOL...

A PHRENOLOGIST IS SOMETHING LIKE A FORTUNE TELLER, EXCEPT THAT HE READS YOUR HEAD INSTEAD OF YOUR PALM!

HIS FATHER THOUGHT YOU MIGHT BE ABLE TO ADVISE US ABOUT HIS FUTURE!

I CAN, MADAM... THAT'S EXACTLY WHAT MY PROFESSION IS FOR!

"THIS YOUNG MAN SHOWS AN APPETITE FOR CHEMISTRY! SOME DAY HE WILL FOLLOW THAT LINE OF ENDEAVOR!"

EVERY BUMP TELLS ME SOMETHING! THIS ONE INDICATES CURIOSITY! THIS ONE STUBBORNNESS... AND THIS ONE INDICATES A SENSE OF HUMOR!

HE MAY BECOME A BIG INFLUENCE IN NATIONAL AFFAIRS, AND HAVE HIS NAME GO DOWN IN HISTORY!!

THAT'S WHAT I SAID... A LEADER IN NATIONAL AFFAIRS! MAYBE A PRESIDENT OR A GENERAL OF SOMETHING!

PHOOEY! YOU'RE NOTHIN' BUT A NOTHIN'!!

WHAM

SOCK

BOP

GOSH, WHAT A BUMP!!

YOU BETTER TAKE ANOTHER SQUINT! I THINK A GUY NAMED TUFFY MCGINNESS JUST CHANGED MY WHOLE FUTURE!

"Out

on the open range with the real "drawn from the woods" buckaroos. In the machine shop among the boys with the overalls and lunch pails. Just a cross section of life taken from

Our

daily lives. A human interest picture of the family at home. It might be your house or mine. You'll get the subtle humor in every cartoon of The Bulletin's daily feature, "Out

Way"
